REST API Endpoints Reference

■ Summary

Module	Endpoints
■ Auth APIs	8
■ User APIs	5
■ Restaurant APIs	5
■ Branch APIs	6
■ Category APIs	7
■ Menu Item APIs	8
■ Variant APIs	4
■ Add-on APIs	4
■ Restaurant Table APIs	7
■ Reservation APIs	8
■ Order APIs	10
■ Order Item APIs	2
■ Payment APIs	5
■ Reports APIs	4
Total	83

■ Auth APIs */api/auth*

8 endpoints

Method	Endpoint	Description	Access
POST	<i>/api/auth/register</i>	Register a new customer account	Public
POST	<i>/api/auth/login</i>	Login with email & password	Public
POST	<i>/api/auth/refresh-token</i>	Get new access token using refresh token	Public
POST	<i>/api/auth/logout</i>	Invalidate refresh token	Authenticated
GET	<i>/api/auth/oauth2/google</i>	Initiate Google OAuth2 login	Public

Method	Endpoint	Description	Access
GET	/api/auth/me	Get currently logged in user profile	Authenticated
PUT	/api/auth/me	Update own profile	Authenticated
PUT	/api/auth/me/password	Change own password	Authenticated

■ User APIs /api/admin/users

5 endpoints

Method	Endpoint	Description	Access
GET	/api/admin/users	Get all users	ADMIN
GET	/api/admin/users/{id}	Get a user by ID	ADMIN
PATCH	/api/admin/users/{id}/toggle-active	Activate or deactivate a user	ADMIN
PATCH	/api/admin/users/{id}/roles	Assign or update roles of a user	ADMIN
DELETE	/api/admin/users/{id}	Delete a user	ADMIN

■ Restaurant APIs /api/restaurants

5 endpoints

Method	Endpoint	Description	Access
POST	/api/restaurants	Create a new restaurant	ADMIN
GET	/api/restaurants	Get all restaurants	ADMIN
GET	/api/restaurants/{id}	Get a restaurant by ID	ADMIN
PUT	/api/restaurants/{id}	Update restaurant details	ADMIN
DELETE	/api/restaurants/{id}	Delete a restaurant	ADMIN

■ Branch APIs /api/branches

6 endpoints

Method	Endpoint	Description	Access
POST	/api/restaurants/{restaurantId}/branches	Create a new branch	ADMIN
GET	/api/restaurants/{restaurantId}/branches	Get all branches of a restaurant	Public
GET	/api/branches/{id}	Get a branch by ID	Public
PUT	/api/branches/{id}	Update branch details	ADMIN MANAGER
DELETE	/api/branches/{id}	Delete a branch	ADMIN

Method	Endpoint	Description	Access
PATCH	/api/branches/{id}/toggle-active	Activate or deactivate a branch	ADMIN

■ Category APIs /api/categories

7 endpoints

Method	Endpoint	Description	Access
POST	/api/branches/{branchId}/categories	Create a new category	MANAGER
GET	/api/branches/{branchId}/categories	Get all categories of a branch	Public
GET	/api/categories/{id}	Get a category by ID	Public
PUT	/api/categories/{id}	Update category details	MANAGER
DELETE	/api/categories/{id}	Delete a category	MANAGER
PATCH	/api/categories/{id}/toggle-active	Show or hide a category	MANAGER
PATCH	/api/categories/reorder	Update display order of categories	MANAGER

■ Menu Item APIs /api/items

8 endpoints

Method	Endpoint	Description	Access
POST	/api/categories/{categoryId}/items	Add a new menu item	MANAGER
GET	/api/branches/{branchId}/items	Get full menu of a branch	Public
GET	/api/categories/{categoryId}/items	Get items under a category	Public
GET	/api/items/{id}	Get a menu item by ID	Public
PUT	/api/items/{id}	Update menu item details	MANAGER
DELETE	/api/items/{id}	Delete a menu item	MANAGER
PATCH	/api/items/{id}/toggle-available	Mark item available or sold out	MANAGER STAFF
PATCH	/api/items/reorder	Update display order of items	MANAGER

■ Variant APIs /api/variants

4 endpoints

Method	Endpoint	Description	Access
POST	/api/items/{itemId}/variants	Add a variant to a menu item	MANAGER
GET	/api/items/{itemId}/variants	Get all variants of a menu item	Public

Method	Endpoint	Description	Access
PUT	/api/variants/{id}	Update a variant	MANAGER
DELETE	/api/variants/{id}	Delete a variant	MANAGER

■ Add-on APIs /api/addons

4 endpoints

Method	Endpoint	Description	Access
POST	/api/items/{itemId}/addons	Add an add-on to a menu item	MANAGER
GET	/api/items/{itemId}/addons	Get all add-ons of a menu item	Public
PUT	/api/addons/{id}	Update an add-on	MANAGER
DELETE	/api/addons/{id}	Delete an add-on	MANAGER

■ Restaurant Table APIs /api/tables

7 endpoints

Method	Endpoint	Description	Access
POST	/api/branches/{branchId}/tables	Add a new table to a branch	MANAGER
GET	/api/branches/{branchId}/tables	Get all tables of a branch	MANAGER STAFF
GET	/api/branches/{branchId}/tables/available	Get available tables for date, time & guests	Public
GET	/api/tables/{id}	Get a table by ID	MANAGER STAFF
PUT	/api/tables/{id}	Update table details	MANAGER
DELETE	/api/tables/{id}	Delete a table	MANAGER
PATCH	/api/tables/{id}/toggle-active	Activate or deactivate a table	MANAGER

■ Reservation APIs /api/reservations

8 endpoints

Method	Endpoint	Description	Access
POST	/api/reservations	Create a new reservation	CUSTOMER
GET	/api/reservations/my	Get all reservations of logged in user	CUSTOMER
GET	/api/reservations/{id}	Get a reservation by ID	CUSTOMER MANAGER STAFF
PATCH	/api/reservations/{id}/cancel	Cancel a reservation	CUSTOMER MANAGER
GET	/api/branches/{branchId}/reservations	Get all reservations of a branch	MANAGER STAFF

Method	Endpoint	Description	Access
GET	/api/branches/{branchId}/reservations/today	Get today's reservations	MANAGER STAFF
PATCH	/api/reservations/{id}/confirm	Confirm a reservation	MANAGER STAFF
PATCH	/api/reservations/{id}/complete	Mark reservation as completed	MANAGER STAFF

■ Order APIs /api/orders

10 endpoints

Method	Endpoint	Description	Access
POST	/api/orders	Place a new order	CUSTOMER
GET	/api/orders/my	Get all orders of logged in customer	CUSTOMER
GET	/api/orders/{id}	Get order details by ID	CUSTOMER STAFF KITCHEN MANAGER
PATCH	/api/orders/{id}/cancel	Cancel an order	CUSTOMER
GET	/api/orders/{id}/track	Track live order status	CUSTOMER
GET	/api/branches/{branchId}/orders	Get all orders of a branch	MANAGER STAFF
GET	/api/branches/{branchId}/orders/active	Get all active orders	STAFF KITCHEN
GET	/api/branches/{branchId}/orders/today	Get today's orders	MANAGER STAFF
PATCH	/api/orders/{id}/confirm	Confirm an order	STAFF MANAGER
PATCH	/api/orders/{id}/status	Update order status	STAFF MANAGER

■ Order Item APIs /api/order-items

2 endpoints

Method	Endpoint	Description	Access
GET	/api/orders/{orderId}/items	Get all items of an order	CUSTOMER STAFF KITCHEN MANAGER
PATCH	/api/order-items/{id}/status	Update individual item prep status	KITCHEN

■ Payment APIs /api/payments

5 endpoints

Method	Endpoint	Description	Access
POST	/api/payments/initiate	Initiate payment, creates Razorpay order	CUSTOMER
POST	/api/payments/verify	Verify payment after Razorpay callback	CUSTOMER

Method	Endpoint	Description	Access
POST	/api/payments/webhook	Razorpay webhook for payment updates	Public
GET	/api/payments/order/{orderId}	Get payment details for an order	CUSTOMER MANAGER
POST	/api/payments/{id}/refund	Initiate a refund	MANAGER

■ Reports APIs /api/reports

4 endpoints

Method	Endpoint	Description	Access
GET	/api/branches/{branchId}/reports/revenue	Revenue summary by date range	MANAGER
GET	/api/branches/{branchId}/reports/orders	Order count and breakdown by type	MANAGER
GET	/api/branches/{branchId}/reports/top-items	Best selling menu items	MANAGER
GET	/api/branches/{branchId}/reports/peak-hours	Peak ordering hours analysis	MANAGER
